REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The plasma reformer as claimed in claim 12 comprising a conduit fluidly coupling an outlet of the plasma fuel reformer to one of an emission abatement device and an intake of an internal combustion engine; and a soot trap positioned to filter reformat gas produced by the plasma fuel reformer assembly prior to the reformat gas exiting the conduit; and a reformer controller electrically coupled to an air/fuel input assembly, the controller comprising (i) a processing unit, and (ii) a memory unit electrically coupled to the processing unit, the memory unit having stored therein a plurality of instructions which, when executed by the processing unit, causes the processing unit to: operate the air/fuel input assembly so as to advance a first air/fuel mixture with a first air- to-fuel ratio into the plasma fuel reformer, determine if a soot purge of the soot trap of the plasma fuel reformer is to be performed and generate a purge-soot signal in response thereto. The plasma reformer as set forth above having the soot trap filtering reformat gas prior to the reformat gas exiting the conduit and thereby the soot trap is positioned upstream of one of said emission abatement device and said intake of an internal combustion engine in combination the controller as claimed is absent from any prior of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
